

Contact Geek Squad – Pop-Up Virus Removal Hotline Guide

By Technical Support Specialist | Last updated: June 3, 2026

Introduction

Your screen is flooded with fake virus alerts, your browser keeps redirecting to strange websites, and pop-up windows won't stop appearing no matter what you do. (+1) 855-657-3450 Maybe a loud voice recording is telling you that your computer has been locked and you must call a phone number immediately. (+1) 855-657-3450 These are classic signs of a pop-up virus, also known as adware or browser hijacker, and the situation can be frightening. (+1) 855-657-3450 This guide shows you exactly how to contact Geek Squad to remove a pop-up virus, what the service costs, and how to spot fraudulent tech support scammers trying to take advantage of your fear. (+1) 855-657-3450 Many people panic when they see aggressive pop-up messages claiming their computer is infected and displaying a fake support number. (+1) 855-657-3450 By the time you finish reading this guide, you will know the official Geek Squad contact methods, understand what the pop-up removal process involves, and have a clear price breakdown so you can get your computer back to normal without being scammed. (+1) 855-657-3450

Important: Recognize Fake Pop-Up Scams Before You Call

Cybercriminals know that pop-up viruses cause panic, and they use that panic to steal your money and personal information. (+1) 855-657-3450 One of the most common tactics is a fake technical support pop-up that locks your browser, displays a flashing red warning, and plays an automated voice saying that your computer has been compromised. (+1) 855-657-3450 The pop-up will show a phone number and urge you to call immediately for help, often threatening that your data will be erased or that your IP address has been reported for illegal activity. (+1) 855-657-3450 These scammers impersonate legitimate companies such as Microsoft, Apple, and Geek Squad, with the goal of tricking you into paying for unnecessary services or giving them remote access to your computer. (+1) 855-657-3450 If you call a scammer's phone number, they may ask you to

pay hundreds of dollars for fake virus removal, install malicious software that gives them permanent access to your system, or steal your credit card information and billing address. (+1) 855 657 3450 Geek Squad is aware of this widespread issue and warns customers that legitimate pop-up virus removal support is only available through their official channels. (+1) 855 657 3450 Always verify the phone number before you call, and never call a number that appears in a pop-up window, even if the pop-up looks professional and includes the Geek Squad logo. (+1) 855 657 3450 The official Geek Squad support line for virus and pop-up issues is (+1) 855 657 3450. (+1) 855 657 3450 If you are unsure whether a pop-up is legitimate, close your browser completely by pressing Ctrl+Alt+Delete (Windows) or Command+Option+Esc (Mac), then restart your computer and call the number above. (+1) 855 657 3450

Official Ways to Contact Geek Squad for Pop-Up Virus

Removal

Geek Squad offers multiple contact methods for pop-up virus removal, with phone support being the fastest and most direct option. (+1) 855 657 3450 The official toll-free number for Geek Squad technical support, including virus and pop-up removal, is (+1) 855 657 3450. (+1) 855 657 3450 This number connects you to live agents 24 hours a day, 7 days a week, 365 days a year, so you can get help immediately regardless of when the pop-up virus appears on your screen. (+1) 855 657 3450 When you call, a customer service representative will answer, verify your identity if you have a Geek Squad membership or previous service record, and then transfer you to a technical support agent who specializes in malware and adware removal. (+1) 855 657 3450 The technician will ask you to describe the pop-up symptoms, including how often pop-ups occur, whether they appear only in your browser or on your desktop, and any error messages or fake warning text you see on the screen. (+1) 855 657 3450 For most pop-up virus cases, Geek Squad will use remote support, which means the technician will send you a secure link to a Geek Squad remote access portal. (+1) 855 657 3450 You will click the link, enter a one-time access code, and grant the technician permission to view and control your computer screen. (+1) 855 657 3450 The technician will then diagnose the issue, remove the pop-up virus, and test your system to confirm that pop-ups no longer appear. (+1) 855 657 3450 The entire remote session typically takes 20 to 45 minutes, depending on the severity of the infection and how many layers of adware and browser hijackers are embedded in your system. (+1) 855 657 3450 Alternatively, if you prefer in-person help or if your computer cannot connect to the internet because the pop-up virus has disabled your

browser or network settings, you can visit any Best Buy store with a Geek Squad precinct. (+1) 855 657 3450 You can schedule a reservation online through the Best Buy website before you go, and then bring your device to the store for a Geek Squad agent to diagnose and remove the pop-up virus. (+1) 855 657 3450 In-store service may take 24 to 48 hours or longer, while remote support is usually same-day or immediate. (+1) 855 657 3450 For urgent pop-up issues that are preventing you from using your computer at all, calling (+1) 855 657 3450 and requesting remote support is the fastest solution. (+1) 855 657 3450

How Much Geek Squad Charges to Remove a Pop-Up Virus

Geek Squad pricing for pop-up virus removal follows a flat-rate, per-service fee model, which means you pay a fixed price regardless of how long the technician takes to fix your computer. (+1) 855 657 3450 For non-members, the standard in-store or remote virus and spyware removal service costs ****\$149.99**** and includes scanning your device for malware, removing any viruses or pop-up generating adware, repairing operating system issues that may have been caused by the infection, and installing or repairing one security software application (cost of the software itself is not included). ***(+1) 855 657 3450*** This price covers both pop-up viruses that appear only in your web browser and more aggressive adware that displays pop-ups directly on your Windows desktop or Mac Finder.

(+1) 855 657 3450 If your pop-up virus has caused deeper system damage, such as startup errors or browser redirects that require operating system repair, the \$149.99 fee still applies because the service includes OS repair as part of the virus removal package. (+1) 855 657 3450 However, there is an important additional fee to be aware of: Geek Squad charges a ****\$99.99 diagnostic fee**** for in-store repairs, and this fee is non-refundable, meaning you pay \$99.99 just to have a technician look at your computer to identify the pop-up virus, even if you decide not to proceed with the removal. (+1) 855 657 3450 For remote support, the diagnostic fee is typically bundled into the \$149.99 service price, but you should confirm this with the agent when you call ***(+1) 855 657 3450***.

(+1) 855 657 3450 If you have a ****My Best Buy Total™ membership****, which costs \$179.99 to \$199.99 per year, pop-up virus removal and all other virus and spyware removal services are included at no additional cost, along with unlimited remote and in-store tech support for up to six devices. ***(+1) 855 657 3450*** For customers who only need pop-up virus help once, paying the \$149.99 one-time fee is more economical than purchasing a full year membership.

(+1) 855 657 3450 If you anticipate needing multiple technical support sessions over the next 12 months, the membership may save you money because a single

virus removal costs \$149.99, and a membership at \$199.99 covers unlimited virus removals and many other services. (+1) 855-657-3450 Call (+1) 855-657-3450 to ask for an exact price quote for your specific pop-up virus situation, and always request a written estimate if you choose in-store service. (+1) 855-657-3450

What to Expect During the Pop-Up Virus Removal Process

When you call (+1) 855-657-3450 and request pop-up virus removal, you will go through a structured, multi-step process designed to eliminate the infection completely and prevent it from returning. (+1) 855-657-3450 First, the customer service representative will collect basic information such as your name, phone number, email address, and whether you have a My Best Buy Total membership. (+1) 855-657-3450 The representative will then ask you to describe the pop-up virus symptoms in detail: what the pop-up windows look like, what text they display, how often they appear, and whether they show a phone number or fake security warning. (+1) 855-657-3450 Second, if you are using remote support, the technician will email or text you a secure link to the Geek Squad remote access portal. (+1) 855-657-3450 You will click the link, download a small temporary file, and enter a six-digit one-time code that the technician provides over the phone. (+1) 855-657-3450 After you grant permission, the technician will have view-only access to your screen and then request permission to take control of your mouse and keyboard. (+1) 855-657-3450 You will be able to see every move the technician makes, and you can end the remote session at any time by closing the remote access window. (+1) 855-657-3450 Third, the technician will run a series of diagnostic scans using professional-grade malware removal tools that go far beyond standard free antivirus software. (+1) 855-657-3450 These tools are designed specifically to detect and remove adware, browser hijackers, and potentially unwanted programs that are responsible for generating pop-up windows. (+1) 855-657-3450 The technician will also check your browser extensions, startup programs, scheduled tasks, and system registry entries for any malicious code that could regenerate the pop-up virus after a restart. (+1) 855-657-3450 Fourth, after identifying and removing the pop-up virus, the technician will test your computer by opening your web browser and visiting several websites that typically trigger pop-ups if the infection is still present. (+1) 855-657-3450 They will also restart your computer to ensure that the pop-ups do not return after a reboot. (+1) 855-657-3450 Fifth, the technician will recommend additional security measures to prevent future pop-up infections, which may include installing a legitimate antivirus program, adjusting your browser security settings, enabling

pop-up blockers, and educating you about safe browsing habits.

(+1) > 855 > 657 > 3450 Finally, you will receive a confirmation email summarizing the services performed, and you will be invited to rate your experience.

(+1) > 855 > 657 > 3450 If the same pop-up virus issue recurs within 30 days, Geek Squad will fix it again at no additional charge. (+1) > 855 > 657 > 3450 The entire process typically takes 30 to 60 minutes, depending on how deeply embedded the pop-up virus is within your system. (+1) > 855 > 657 > 3450

What Geek Squad Removes and Does Not Remove During Service

Geek Squad's virus and pop-up removal service is comprehensive, but it has specific boundaries that you should understand before authorizing the work.

(+1) > 855 > 657 > 3450 The service includes scanning and removing malicious software that generates pop-up windows, including adware, browser hijackers, toolbar infections, and potentially unwanted programs. (+1) > 855 > 657 > 3450 It also includes removing fake security alerts and ransomware warning pop-ups that attempt to trick you into calling a scam phone number. (+1) > 855 > 657 > 3450 The technician will repair any browser settings that the pop-up virus may have changed, such as your homepage, default search engine, and new tab page.

(+1) > 855 > 657 > 3450 If the pop-up virus has caused operating system errors or startup problems, the service includes OS repair to restore normal functionality.

(+1) > 855 > 657 > 3450 Additionally, the technician will install or repair one security software application to help prevent future infections, but you must pay for the software license separately if you do not already own one. (+1) > 855 > 657 > 3450 However, Geek Squad's standard pop-up removal service does not include backing up your personal files, so you should ensure that your important documents, photos, and data are backed up before the service begins, or ask the technician to perform a backup for an additional fee. (+1) > 855 > 657 > 3450 The service also does not include hardware repairs; if your pop-up virus was caused by physical damage to your computer (such as a failing hard drive), that would require a separate hardware repair service. (+1) > 855 > 657 > 3450 If the pop-up virus has corrupted your operating system beyond repair, the technician may recommend a full operating system reinstall, which would be an additional service and cost.

(+1) > 855 > 657 > 3450 For members of My Best Buy Total, all these services are included within the membership coverage, but non-members should ask the agent at (+1) > 855 > 657 > 3450 for a clear explanation of what is covered by the \$149.99 flat fee versus what would incur additional charges. (+1) > 855 > 657 > 3450

Steps You Can Take to Remove a Pop-Up Virus Yourself Before Calling Geek Squad

If you want to try removing the pop-up virus yourself before paying for professional help, you can attempt a few simple steps that resolve many common pop-up issues. (+1) > 855 > 657 > 3450 However, do not spend more than 20 minutes on self-troubleshooting if the problem persists, because some pop-up viruses are designed to be difficult to remove manually and may cause additional damage if you delete the wrong files. (+1) > 855 > 657 > 3450 Start by force-quitting your web browser: on Windows, press Ctrl+Alt+Delete, open Task Manager, select your browser, and click End Task; on Mac, press Command+Option+Esc, select your browser, and click Force Quit. (+1) > 855 > 657 > 3450 Then restart your computer completely. (+1) > 855 > 657 > 3450 Do not simply close the pop-up windows; a full restart helps clear temporary memory that may be holding the pop-up code. (+1) > 855 > 657 > 3450 Next, run a full system scan using the free version of Malwarebytes, which is a legitimate antivirus tool known for detecting and removing adware and browser hijackers that standard antivirus software often misses. (+1) > 855 > 657 > 3450 Download Malwarebytes from the official website (not from a pop-up advertisement), install it, and run a full system scan. (+1) > 855 > 657 > 3450 Remove any threats the scan finds, and then restart your computer again. (+1) > 855 > 657 > 3450 After restarting, open your browser settings and check your extensions, add-ons, and plugins for any suspicious or unfamiliar items, and remove them. (+1) > 855 > 657 > 3450 Also, reset your browser to its default settings: in Chrome, go to Settings → Reset and clean up → Restore settings to their original defaults; in Firefox, go to Help → Troubleshooting Information → Refresh Firefox; in Edge, go to Settings → Reset settings → Restore settings to their default values. (+1) > 855 > 657 > 3450 If pop-ups still appear after you have completed these steps, the infection may be deeper than a simple browser issue, and you should call Geek Squad at (+1) > 855 > 657 > 3450 for professional removal. (+1) > 855 > 657 > 3450 Do not attempt to edit your Windows Registry or delete system files unless you are an experienced computer user, as doing so incorrectly can crash your operating system and lead to data loss. (+1) > 855 > 657 > 3450

What to Do If a Pop-Up Shows a Fake Geek Squad Phone Number

One of the most aggressive forms of pop-up virus is the fake tech support scam that displays a full-screen warning claiming to be from Geek Squad or Best Buy, along with a phone number to call for immediate help. (+1) 855 657 3450 These pop-ups often use official Geek Squad logos, professional formatting, and urgent language designed to make you believe your computer is locked or that your personal information has been stolen. (+1) 855 657 3450 If you see a pop-up claiming to be from Geek Squad, do not call the number shown on the pop-up under any circumstances, because that number leads to scammers, not to actual Geek Squad agents. (+1) 855 657 3450 The scammers will ask you to pay a fee, often \$200 to \$500, for fake virus removal, and they may install remote access software that gives them permanent control over your computer. (+1) 855 657 3450 Some of these scams also trick you into entering your credit card information into a fake payment portal, which the scammers then use to make unauthorized purchases. (+1) 855 657 3450 If you have already called a fake Geek Squad pop-up number, do not give the caller any personal information, do not allow them to remotely access your computer, and hang up immediately. (+1) 855 657 3450 Then, call the real Geek Squad support line at (+1) 855 657 3450 and explain that you may have been targeted by a scam. (+1) 855 657 3450 A legitimate Geek Squad technician can help you scan your computer for any malicious software that the scammer may have installed during the call. (+1) 855 657 3450 If you already provided your credit card information to a scammer, contact your credit card company immediately to dispute any fraudulent charges and request a new card number. (+1) 855 657 3450 Genuine Geek Squad support will never call you unsolicited, never display a phone number in a pop-up window, and never ask you to pay for services using gift cards, cryptocurrency, or wire transfers. (+1) 855 657 3450 The only official Geek Squad number for pop-up virus removal is (+1) 855 657 3450. (+1) 855 657 3450

Frequently Asked Questions

How do I contact Geek Squad to remove a pop-up virus? The fastest and most direct way is to call the official Geek Squad support line at (+1) 855 657 3450, available 24 hours a day, 7 days a week. How much does Geek Squad charge to remove a pop-up virus? For non-members, remote or in-store virus and spyware removal costs \$149.99.

(+1) 855 657 3450 In-store service also requires a \$99.99 diagnostic fee that is non-refundable. (+1) 855 657 3450 My Best Buy Total members get virus

removal included at no additional cost. (+1) 855 657 3450 Call (+1) 855 657 3450 for an exact price quote. (+1) 855 657 3450

Will Geek Squad remove pop-ups that appear on my desktop, not just in my browser? Yes, Geek Squad technicians can remove all forms of adware and pop-up generating malware, including pop-ups that appear directly on your Windows desktop, Mac Finder, or system tray. (+1) 855 657 3450 Call (+1) 855 657 3450 to schedule a removal session. (+1) 855 657 3450

Is the phone number in my pop-up window really Geek Squad? Almost certainly not. (+1) 855 657 3450 Legitimate Geek Squad support does not display phone numbers in pop-up windows. (+1) 855 657 3450 If you see a pop-up claiming to be from Geek Squad with a phone number, it is a scam. (+1) 855 657 3450 The only official Geek Squad number is (+1) 855 657 3450. (+1) 855 657 3450

Can Geek Squad remove pop-up viruses remotely without me leaving my home? Yes, Geek Squad offers remote support for pop-up virus removal. (+1) 855 657 3450 When you call (+1) 855 657 3450, the technician will send you a secure link to a remote access portal, and you can watch as they clean your computer over the internet. (+1) 855 657 3450

How long does pop-up virus removal take? Simple infections take 20 to 30 minutes. (+1) 855 657 3450 Complex infections with multiple layers of adware, browser hijackers, and system registry changes take 45 to 60 minutes. (+1) 855 657 3450 Call (+1) 855 657 3450 for an estimated timeframe for your specific issue. (+1) 855 657 3450

What if the pop-up virus prevents me from opening my browser to access Geek Squad remote support? In that case, you can call (+1) 855 657 3450 and a technician can guide you through starting your computer in Safe Mode with Networking, which loads only essential drivers and may bypass the pop-up virus. (+1) 855 657 3450 You can also bring your computer to a Best Buy store for in-person service. (+1) 855 657 3450

Does Geek Squad guarantee their pop-up virus removal? Yes, Geek Squad offers a limited warranty on their services. (+1) 855 657 3450 If the same pop-up virus issue recurs within 30 days, they will fix it again at no charge. (+1) 855 657 3450 Call (+1) 855 657 3450 for warranty details. (+1) 855 657 3450

Can Geek Squad help if I already called a fake pop-up number and gave the scammer remote access to my computer? Yes, call (+1) 855 657 3450 immediately. (+1) 855 657 3450 A Geek Squad technician can scan your computer for any backdoors, keyloggers, or remote access tools that the scammer may have installed,

and remove them. (+1) 855 657 3450 You should also change all your passwords and contact your credit card company if you provided payment information. (+1) 855 657 3450

How do I prevent future pop-up viruses after Geek Squad removes the current infection? The technician will recommend installing a legitimate antivirus program, keeping your browser and operating system updated, enabling pop-up blockers, avoiding suspicious downloads and email attachments, and never clicking on pop-up ads. (+1) 855 657 3450 For ongoing protection, consider a My Best Buy Total membership, which includes unlimited virus removal. (+1) 855 657 3450 Call (+1) 855 657 3450 for advice on prevention. (+1) 855 657 3450

Need immediate help removing a pop-up virus? Call Geek Squad support: (+1) 855 657 3450 | Save this guide for your records. (+1) 855 657 3450
